In his opening remarks at the first symposium in this series Professor Robert Good pointed out that Galileo in the 17th century was quite likely the first investigator to observe contact angle behavior with his experiment of floating a thin gold leaf on top of a water surface. Since that time contact angle measurements have found wide application as a method for determining the energetics of surfaces. This, in turn, has a profound effect on the wettability and adhesion of liquids and coatings to surfaces.

This symposium will be concerned with both the fundamental and applied aspects of contact angle measurements. Issues such as the applicability and validity of various measurement techniques and the proper theoretical framework for the analysis of contact angle data will be of prime concern.

In addition, a host of applications of the contact angle technique will be explored including but not limited to: wettability of powders, fibers, wood products, papers, polymers and monolayers. Further focus will be on the use of contact angle data in evaluating surface modification procedures, determining relevance of wettability to adhesion, the role of wettability in bioadhesion, ophthalmology, prosthesis and in the control of dust in mining and milling applications. The primary focus of this symposium is to provide a forum for the discussion of cutting edge advancements in the field and to review and consolidate the accomplishments which have been achieved thus far.

SESSION I: WEDNESDAY, JUNE 23, 2010: ADVANCED AND NOVEL MEASUREMENT METHODS I

8:00 am: INTRODUCTORY REMARKS

8:05-8:35: S. F. Chini, A. Amirfazli; Department of Mechanical Engineering, University of Alberta, Edmonton, AB, CANADA T6G 2G8; A New Method for Measuring the Contact Angle of Asymmetric and Symmetric Drops

8:35-9:05: Javier Montes Ruiz-Cabello, Felipe II Guerrero-Barba, Miguel A. Rodriguez-Valverde, Miguel A. Cabrerozo-Vílchez; Biocolloid and Fluid Physics Group, Department of Applied Physics, University of Granada, SPAIN; A New Strategy to Predict the Equilibrium Contact Angle of Rough Homogeneous Surfaces from Contact Angle Hysteresis Measurements

9:05-9:35: Srinivas Mettu and Manoj K. Chaudhury; Department of Chemical Engineering, Lehigh University, Bethlehem, PA 18015; Stochastic Relaxation of the Contact Line of a Water Drop on a Solid Substrate Subjected to White Noise Vibration: Roles of Hysteresis

9:35-10:05: Bharadwaj R. Prabhala, Mahesh V. Panchagnula, and Srikant Vedantam; Department of Mechanical Engg., Tennessee Technological University, Cookeville, TN 38501, USA; Equilibrium Shapes of Drops on Hysteretic Surfaces

10:05-10:25: COFFEE BREAK

10:25-10:55: Halim Kusumaatmaja, Y. Li, R. Dimova and R. Lipowsky; MPI of Colloids and Interfaces, Am Muhlenberg 2, D-14476 Golm/Potsdam, GERMANY; Wetting on Membranes

10:55-11:25: Edward Bormashenko; Ariel University Center of Samaria, Applied Physics Faculty, Ariel, Israel, 40700, P.O.B. 3; Novel Investigations of Liquid Marbles

11:25-11:55: Thomas Bahners; Deutsches Textilforschungszentrum Nord-West e. V., Institut an der Universität Duisburg-Essen Adlerstraße 1, 47798 Krefeld, GERMANY; The “Do’s” and “Donts” of Wettability Characterization in Textiles

11:55-1:30: LUNCH

SESSION II: WEDNESDAY, JUNE 23, 2010: ADVANCED AND NOVEL MEASUREMENT METHODS II

1:30-2:00: Rafael Tadmor, Prashant Bahadur, Aisha Leh, Hartmann E. N’guessan, Rajiv Jaini, Lan Dang and Dan F. Smith Department of Chemical Engineering, Lamar University, Beaumont TX 77710; The Influence of Normal Force on the Lateral Force at the Interface Between a Liquid Drop and a Surface

2:00-2:30: Konrad Terpiłowski, Małgorzata Bielska, Krystyna Prochaska and Emil Chibowski; Department of Physical Chemistry – Interfacial Phenomena, Faculty of Chemistry, Maria Curie-Skłodowska University, Lublin, POLAND; Apparent Surface Free Energy of Ultrafiltration Membranes
SESSION III: THURSDAY, JUNE 24, 2010:
CONTACT ANGLE FOR SURFACE CHARACTERIZATION

8:00-8:30: A. A. Hamouda, University of Stavanger, P. O. Box 8002 Ullandhaug, 4068 Stavanger, NORWAY;
Wettability Alteration of Sand Stone by Nitrogen Based Component and its Effect on the Interfacial Charge Between Asphaltic Model Oil and Sulfate and Magnesium Ions

8:30-9:00: Jules S. Diawara; Laboratoire de Génie des Procédés et Matériaux, Ecole Centrale Paris, 92290 Châtenay Malabry, Bureau 349, FRANCE; Forced Wetting of Steels by Liquid Zinc

9:00-9:30: Augustin Karasangabo and Bernhard Christian ; University of Leoben, Franz-Josef-Straße 18, A- 8700 Leoben, AUSTRIA; Investigation of the Nature of Liquid Steel – Alumina Interfacial Interactions from Sessile Drop Measurements: Cases of Fe-Ti and Fe-P Alloys

9:30-10:00: Peichun Amy Tsai, Christophe Pirat, Detlef Lohse, Alisia M. Peters, Rob Lammertink, Matthias Wessling, Sergio Pacheco and Leon Lefferts; Physics of Fluids Group, University of Twente, THE NETHERLANDS; Wetting Transition, Drop Impact, and Micro-flows upon Hydrophobic Microstructures

10:00-10:20: COFFEE BREAK

SESSION IV: THURSDAY, JUNE 24, 2010: ADVANCED AND NOVEL APPLICATIONS

1:30-2:00: Kyoo-Chul (Kenneth) Park, Shreerang S. Chhatre, Wonjae Choi, Robert E. Cohen, and Gareth H. McKinley; Robustness Analysis of Non-Wetting Surfaces Based on Distorted Liquid-Air Interfaces of Droplets

2:00-2:30: Wei Xu, Rajesh Leeladhar, and Chang-Hwan Choi; Department of Mechanical Engineering, Stevens Institute of Technology, NJ, USA; Effects of Micro and Nano Particles on Wetting Dynamics of Evaporating Droplets on Superhydrophobic Surfaces

2:30-3:00: Tamir Stein; Ariel University Center of Samaria, Department of Chemical Engineering and Materials. Bar-Ilan University, Chemistry Department; Electrostatically Driven Droplets Deposited on Superhydrophobic Surfaces

3:00-3:30: Jonathan Rothstein; Mechanical and Industrial Engineering, University of Massachusetts, Amherst, MA 01003; Drag Reduction Using Superhydrophobic Surfaces

3:30-3:50: COFFEE BREAK

3:50-4:20: Yu Fu and W. H. Zhong; School of Mechanical and Materials Engineering, Washington State University, Pullman, WA 99164; Effects of Nano-additives on Dynamic Wetting Behavior and Flowability of Epoxy Resins

SESSION V: FRIDAY, JUNE 25, 2010: MATERIAL ANALYSIS AND SUPERHYDROPHOBIC/HYDROPHILIC STUDIES

8:00-8:30: Andreas Wego, Lutz Prager and Thomas Bahners; Deutsches Textilforschungszentrum Nord-West e.V., Adlerstr. 1, 47798 Krefeld, GERMANY; Creating Super-hydrophilic Surfaces by Photo-induced Micro-Folding

8:30-9:00: Niklas Nordgren Linn Carlsson, Daniel Nyström, Hanna Lönnberg, Josefin Lindqvist, Emma Östmark, Per Antoni, Camilla Nilsson, Anna Carlmark, Linda Fogelström, Anders Hult, Mats Johansson, Mark W. Rutland and Eva Malmström; Department of Fibre and Polymer Technology, Coating Technology, KTH Royal Institute of Technology, Teknikringen 56-58, SE-100 44 Stockholm, SWEDEN; Tailored Interfacial Properties by Surface Grafting: From Tunable Biofiber Adhesion to Superhydrophobic Cellulose

9:00-9:30: Masataka Murahara; Professor Emeritus of Tokai University, JAPAN; Plasma Pre-treatment Effect for Photo-chemical Modification and Patterned Functional Group Substitution onto Low Wettable Materials

9:30-10:00: Y.L. Lam, C.W. Kan, C.W.M. Yuen and C.H. Chui; Institute of Textiles and Clothing, The Hong Kong Polytechnic University, Hung Hom, Kowloon, Hong Kong, CHINA; Surface Physical and Chemical Analysis of Plasma-treated Cotton Fabric Subjected to Wrinkle-resistant Finishing

10:00-10:20: COFFEE BREAK

10:20-10:50: Costin Anghel and Bernard Riedl; Wood Science Department, Laval University, Sainte-Foy, Quebec G1K 7P4, CANADA; Contact Angle Measurements for Monitoring Influence of Atmospheric Pressure Plasma on Wood Surfaces
