

CALL FOR PAPERS

EIGHTH INTERNATIONAL SYMPOSIUM ON

CONTACT ANGLE, WETTABILITY AND ADHESION

To be held at **Université Laval,
Québec City, Québec, CANADA**
June 13-15, 2012

SYMPOSIUM HISTORY AND MOTIVATION

In his opening remarks at the first symposium in this series Professor Robert Good pointed out that Galileo in the 17th century was quite likely the first investigator to observe contact angle behavior with his experiment of floating a thin gold leaf on top of a water surface. Since that time contact angle measurements have found wide application as a method for determining the energetics of surfaces. This, in turn, has a profound effect on the wettability and adhesion of liquids and coatings to surfaces.

This symposium will be concerned with both the fundamental and applied aspects of contact angle measurements. Issues such as the applicability and validity of various measurement techniques and the proper theoretical framework for the analysis of contact angle data will be of prime concern.

In addition, a host of applications of the contact angle technique will be explored including but not limited to: wettability of powders, fibers, wood products, paper, polymers and monolayers. Further focus will be on the use of contact angle data in evaluating surface modification procedures, determining relevance of wettability to adhesion, the role of wettability in bioadhesion, ophthalmology, prosthesis and in the control of dust in mining and milling applications.

AUDIENCE AND PARTICIPATION

The primary focus of this symposium will be to provide a forum for the discussion of cutting edge advancements in the field and to review and consolidate the accomplishments which have been achieved thus far.

SUBMITTING A PAPER

This symposium is being organized under the direction of Dr. K. L. Mittal, Editor-in-Chief, Journal of Adhesion Science and Technology by MST Conferences. Authors are encouraged to submit their manuscripts for publication in the Journal of Adhesion Science and Technology. Please notify the conference chairman of your intentions to present a paper as early as possible. An abstract of about 200 words should be sent by **January 15, 2012** to the conference chairman by any of the following methods:

E-mail: rhl@mstconf.com

FAX: 212-656-1016

Regular mail:

Dr. Robert H. Lacombe
Conference Chairman
3 Hammer Drive
Hopewell Junction, NY 12533

Contact by phone: 845-897-1654;
845-227-7026

Full conference details and registration via the Internet will be maintained on our web site:

www.mstconf.com/contact8.htm

SPONSORING ORGANIZATIONS

We are pleased to acknowledge the support of Université Laval and FPInnovations for their generous support and organizational efforts for this symposium.

SYMPOSIUM TOPICS:

Factors Influencing Contact Angle Measurements:

- ◆ Static and dynamic contact angles, effect of surface flaws and surface roughness on wetting.
- ◆ Effect of pore size distribution
- ◆ Effects of velocity and viscosity of liquid on solid-liquid interfacial behavior.
- ◆ Interaction forces including: van der Waals, Acid-Base, Hydrogen bonding, ...etc

Wettability Behavior and Surface Characterization of Various Materials:

- ◆ Contact angle interpretation and hysteresis.
- ◆ Wettability of various material surfaces including but not limited to: wood, elastomers, silicon wafers, pharmaceutical powders, metals, polymers, paper, particles, fibers... etc.
- ◆ Surface treatments to modify wettability behavior.
- ◆ Superhydrophobicity
- ◆ Electrowetting

Wettability, Adhesion and Applied Aspects of Contact Angle Measurements:

- ◆ Effect of surface energetics on adhesion.
- ◆ Biological applications including protein and bacterial adhesion.
- ◆ Fine particle adhesion and control of dust.
- ◆ Other technological applications including: printing, agriculture, pharmaceuticals, textiles and paper.

ORGANIZERS AND CONTACT INFORMATION

Dr. Bernard Riedl
Wood Science Department
Université Laval
Sainte-Foy, Québec G1K 7P4, CANADA
Tel. 418-656-2437
FAX 418-656-5262
E-mail: Bernard.Riedl@sbf.ulaval.ca

Dr. Pierre Blanchet
FPInnovations
Chef De Groupe - Nanotechnologies Pour Les
Produits du Bois
319, rue Franquet
Québec (QC) G1P 4R4
Tel. 418 659-2647 poste 3331
FAX 418 659-2922
E-mail: pierre.blanchet@fpinnovations.ca

Dr. K .L. Mittal, Director
1983 Route 52, Suite C
P.O. Box 1280
Hopewell Junction, NY 12533-1280 USA
Tel. 845-897-1654
FAX: 845-897-2361
E-mail: klm@mstconf.com

Dr. R. H. Lacombe
Conference Chairman
3 Hammer Drive
Hopewell Junction, NY 12533
USA
Tel. 845-227-7026
FAX: 212-656-1016
E-mail: rhl@mstconf.com
